TECHNICAL SKILLS

Languages: Python, Go, TypeScript

Backend: Node.js, FastAPI, REST APIs, Microservices, RabbitMQ, Redis

Frontend: React, HTML5, CSS3, Tailwind CSS

Databases: PostgreSQL, MySQL, MongoDB, ChromaDB, Pinecone

AI / LLM: OpenAI API, LangChain, Retrieval-Augmented Generation (RAG), Semantic Search, Vector Databases, AI Agents, Voice AI

Cloud & DevOps: AWS (Lambda, EC2, S3, SES, CloudWatch), Docker, Kubernetes, CI/CD, Linux, Git

EXPERIENCE

Associate Software Engineer

Nov. 2024 – Present

CoReCo Technologies

Pune, Maharashtra

- Engineered scalable backend systems, async APIs, and microservices using Node.js, FastAPI, PostgreSQL, Redis/Valkey, and RabbitMQ for BetrLabs, an AI-driven product development platform.
- Owned end-to-end backend architecture across authentication, dataset processing, AI workflows, experiment orchestration, and real-time systems with modular service-oriented design.
- Designed and orchestrated multi-step RAG pipelines integrating OpenAI and Perplexity APIs, automating insights generation across 100+ products/day and reducing analyst turnaround time by 60%.
- Built multi-tenant AI backend infrastructure for Nexus, securely supporting 500+ tenants with RBAC/ABAC authorization, isolated workflows, and scalable retrieval pipelines.
- Developed ETL and data processing pipelines handling 50k+ product records/day with LLM-based enrichment and semantic search workflows, achieving 95% data accuracy.
- Architected production-grade real-time voice AI agents using Twilio, Deepgram, ElevenLabs, WebSockets, and OpenAI processing 1k+ conversations/week with low-latency streaming pipelines.
- Built async background job and task orchestration systems using Redis queues, RabbitMQ, and worker-based execution pipelines for long-running AI and data processing workloads.
- Refactored backend modules into domain-driven and modular architectures with clearly separated services, repositories, and schemas, improving maintainability and reducing engineering overhead.
- Implemented automated testing pipelines using Pytest and integration testing strategies for API validation, improving deployment reliability and reducing production regressions.
- Built and deployed serverless AWS infrastructure using Lambda, SES, S3, and CloudWatch to automate reporting workflows generating 500+ reports/month and reducing manual effort by 80% for Instinct IQ
- Developed scalable frontend systems using React and TypeScript for AI-powered internal tools, analytics dashboards, and operational workflows.
- Led a team of 2 engineers in designing and shipping MVP features, conducting technical interviews, mentoring interns, and improving backend engineering practices.

Software Engineer Intern

Jul. 2024 – Oct. 2024

CoReCo Technologies

Pune, Maharashtra

- Built context-aware LLM chatbot backend systems achieving 95% intent accuracy, improving automated customer support resolution workflows.
- Developed backend APIs and real-time operational modules for Wipro PARI's enterprise parking automation platform using scalable service-oriented architecture principles.

PROJECTS

Orbit | Docker, WebSockets, Go, Node.js, Python

- Ephemeral cloud compute engine that spins up isolated Docker execution environments for secure, on-demand code execution with real-time terminal access.

Shuriken | Python, FastAPI, Agentic Systems, Distributed Architecture

- Agent orchestration SDK for building and running multi-framework AI agents with unified execution, scheduling, RBAC, and lifecycle management of memory, tools, and traces.

EDUCATION

Shivaji University
Bachelor of Science in Computer Science

Jun. 2020 – May 2023
Karad, Maharashtra
